

**Press Release 01/2022 – New from BESSEY:
Clamping element for multifunction tables TW-KLI**

BESSEY expands clamping tool range for multifunction tables

In addition to all-steel table clamps and toggle clamps, BESSEY is offering now another exciting alternative for use on multifunction tables. Based on the popular KliKlamp high-tech lever clamp, the new TW-KLI clamping element combines quality and functionality for fast, easy and safe clamping.

As with the field-proven lever clamp, high-quality materials are used for the new TW20-15-8-KLI clamping element: lightweight stable magnesium for the sliding arm, fiberglass reinforced plastic for the clamping mechanism, cold-drawn quality steel for the rail. Equipped with an adapter at the lower end of the rail, the 300-gram light clamping tool can be integrated without tools into the 20 mm holes of multifunctional tables, such as Festool MFT and Sortimo WorkMo. The clamping element with 150 mm clamping width and 80 mm throat depth is quick and easy to use and will clamp the workpiece securely. The multi-stage ratchet mechanism allows up to 500 N clamping force to be achieved very quickly with little effort. Once clamped in position the TW-KLI is very secure and will not work loose in the event of vibrations, and can be released again very quickly due the red release button.

Two clamping elements are available under item no. TW20-15-8KLI-SET.

*At BESSEY, we have a long tradition of producing **innovative, practical product solutions**. Since the cold drawn steel plant was founded in Stuttgart in 1889, the Bietigheim-Bissingen based company continues to raise the bar in clamping and cutting technology. Currently offering more than 1,600 products, BESSEY has a specific solution for practically every application. Our focus is on precision and durability, convenience and safety.*

“To stop improving is to stop being good.” This was the motto of company founder Max Bessey and it remains our guiding principle today – in all that we do and produce. This means that we are constantly developing new products and improving existing ones to make the user's life easier, on the basis of innovative ideas. Such innovations are worthwhile.
